

Krzysztof Janiec

Senior Software Engineer

Backend Architecture · Full-Stack Development · Event-Driven Systems

● AVAILABLE FOR CONTRACT ROLES

Zielona Góra, Poland · Remote

Senior software engineer with **12+ years** designing, building, and scaling backend systems and full-stack products across e-commerce, IoT, fintech, and ERP domains. Deep expertise in Java/Spring Boot and Node.js/TypeScript backends, event-driven architectures (Kafka, RabbitMQ), and React/Angular frontends — with a track record of taking services from architecture through production ownership, writing clean and maintainable code, and mentoring teammates along the way. Operates exclusively as a 100% remote, B2B contractor, integrating quickly into cross-functional, agile teams.

WORK MODEL

- Remote-first, 100%
- B2B contractor only

PRIMARY STACK

Java TypeScript React
Spring Boot Node.js
PostgreSQL Docker
Kubernetes

SECONDARY STACK

Go Python Angular
NestJS / Express Kafka
RabbitMQ Redis
Elasticsearch CI/CD

EDUCATION

MSc, Computer Science
University of Zielona Góra · 2012–2014

EXPERIENCE

Software Developer — AMB Software / REWE Digital Poland Jul 2024 – Present

- Deliver backend and frontend features for an enterprise e-commerce platform using Java/Spring Boot and Angular/TypeScript.
- Assessed legacy COBOL programs to plan their migration and integration with modern platform services.
- Contributed to a shared library of business components and integrated SSO authentication via Keycloak.

Software Engineer — BIOT Sp. z o.o. Jul 2019 – Jun 2024

- Built and maintained microservices for an IoT lighting management platform using Node.js/NestJS and React, exposing REST, GraphQL, and gRPC APIs.
- Designed real-time, map-based dashboards with PostgreSQL, RabbitMQ, Mapbox GL, and Deck.gl for live streetlight monitoring and control.
- Integrated with third-party hardware and lighting controllers, handling device telemetry at scale over a 5-year tenure.

Software Developer, Java — Cinkciarz.pl Nov 2015 – Jun 2019

- Built Java/Spring Boot & Hibernate microservices and REST APIs powering core fintech currency-exchange operations.
- Delivered Angular frontend modules alongside Dockerized backend services, working closely with QA on release stability.
- Contributed to a forex backoffice system for Cyprus-based staff, integrating with the MetaTrader client platform.

ERP Developer — TRAX S.A. Oct 2013 – Oct 2015

- Customized Infor CloudSuite/Syteline ERP modules for finance, logistics, and supply chain processes.
- Wrote Visual Basic business logic and T-SQL reports supporting daily operational workflows for internal teams.
- Collaborated directly with finance and logistics stakeholders to translate business requirements into ERP configuration.

CURRENTLY EXPLORING

Full-stack contracts with a DevOps component, remote-first, ideally with event-driven or platform architecture work.
